SPONSORING

The SynBioReactor serves as a bridge between academia and industry or the rift between research and innovation, the SynBioReactor Summit brings together StartUps, Founders, Researchers, Companies, Non-profits, and all sorts of other bio-involved entities to connect, exchange, and support each other's journeys.

PROUDLY
DRIVEN BY
COMMUNITY

SYNBIO REACTOR

DIRECTED EVOLUTION

For 2027, the **German Association for Synthetic Biology** is excited to welcome the bio-innovation community back to **silent green** in Berlin. A big part of the event format has been overhauled and we can't wait to explore these new aspects with you.

This year's SynBioReactor is supported by **biobeyond** - a bio-innovation agency building none-physical infrastructure for bio-focused initiatives.

KULTURQUARTIER

As a modern event series with emphasis on connecting people and a strong focus on interactivity and interconnectedness we are super excited to introduce you to our new leading format at the SynBioReactor.

ISLANDS

The summit's program now consists primarily of small fireside chats and open discussion rounds, dedicated to the growing field of synthetic biology. Sessions take place in one of four conversation pits - or "Islands". That way we can bring you a vast selection of speakers and hosts without the long distances between stages/rooms. Each Island gets assigned one of the following umbrella topics.

PLANT

MATERIALS

FOOD

PHARMA

Founding & Translation

Resiliency & Defence

Market & Traction

AI

Scaling

Regulation & Governance

Future

Together with the respective speakers, hosts and discussion leaders, the sessions then explore one or multiple of four verticals in form of a fire side chat, or open discussion.

SESSION TOPICS

FOOD

Founding & Translation

Resiliency & Defence

Market & Traction

AI

Scaling

Regulation & Governance

Future

Together with the respective speakers, hosts, or discussion leaders, the island then explores one of various session topics featured above.

EVOLVING

TOGETHER WITH TECHNOLOGY

In addition to the islands, our new concept also draws from the silent rave or silent conference movements to make sure the place won't get too loud - even with multiple discussions happening simultaneously.

SPEAKER BROADCAST

“That way you can always understand your speaker, your partners in an open discussion or questions from other members of the audience.”

STARTUP PITCHES - 2026

WINNERS

SLOT 07 Session 1

SESSION WINNER

EVERYCARBON

PRESENTER: Agonito Huerta

TNL 4 Biotechnology DE

Next-generation insulation materials from ultra-low-cost waste carbon — bio-better foams with high temperature stability and low emissions.

SLOT 09 Session 1

RUNNER-UP

**LANTHAGEN
BIO LTD**

PRESENTER: Daniel Healy

TNL 4 Biotechnology

Manchester / London, UK

Engineered biological systems combined with a bespoke ML platform for solvent-free, low-carbon recovery of critical metals from e-waste.

SLOT 15 Session 2

SESSION WINNER

**UNITELABS
GMBH**

PRESENTER: Robert Zechin

TNL 7 IT / Software / AI-ML MUNICH, DE

Operating system for AI-driven lab automation, providing unified data infrastructure, bi-directional instrument connectors, and a Lab-as-Code workflow engine.

SYNBIO

ACADEMIA & INNOVATION

BRING YOUR WORK

Not every contribution is a pitch. Two more ways onto the programme — both open to labs, institutes, companies and individuals alike.

PRESENT A POSTER

40 slots

The lowest-friction way to put your research in front of the room. Posters stay up across both days in the exhibition area, next to the booths and the coffee — where the conversations actually happen. A dedicated poster session gives you a stretch where people come to you.

FORMAT

A0 portrait

SCAN ME

GIVE A TALK

12 slots

Talks run inside the Islands — four conversation pits instead of distant stages, so nobody walks five minutes to hear you. Around 20 seats per session plus standing room, and a silent-conference audio setup that keeps four parallel rooms from shouting over each other. Come with a talk, a fireside chat, or a question worth arguing about.

VISIBILITY & HOOKS

FOR YOUR COMPANY & BRANDING

★★★★★
MOST POPULAR

TABLE TOPS

Showcase your brand directly on attendee tables with a custom tabletop display — ideal for highlighting your logo, key message, products, or services.

ROLL UP

Display your 85 × 200 cm branded roll-up banner in a high-traffic area to maximize visibility throughout the event.

Hi!

COMPANY SESSION

Host a 30–45-minute session in one of our Circles, with seating for 16 plus standing room for additional attendees. Sessions can take many formats — such as a Talk, Workshop, or other.

MAIN STAGE SESSION

Host a 10 minute session on the main stage. Taking Place between science and innovation the best spot to advertise your solution, your fund or company.

Please note:
no presentation equipment
is available in this format.

LANYARD

Put your logo front and center — literally around every attendee's neck. Available exclusively as a single, one-time upsell.

BADGE

Get your logo on every attendee badge for maximum visibility throughout the event. Limited to one sponsor and available only as an upsell.

LINKEDIN MARKETING

Reach our LinkedIn audience with a dedicated post highlighting your products or services to our followers and community. Format and size negotiable.

NEWSLETTER PROMO

Get a dedicated promotional space in our newsletter to showcase your products or services directly to our engaged subscriber base. Format and size negotiable.

BANNER ON BALUSTRADE

Display your banner (**80 cm × 2.5m**) on the wall or in the entrance area for high visibility as guests arrive. Banner must be provided by the sponsor, or printing can be arranged for an additional cost.

BANNER ABOVE POSTER

Position your logo and services on a banner (**20cm × 100cm**) displayed above the exhibited scientific posters, connecting your brand with our research-focused audience.

NAMING AND BRANDING THE CATERING

The catering area can carry your name and branding throughout the summit, connecting your company with the moments where attendees meet, recharge and continue conversations between sessions.

BRANDING AT THE COFFEE STAND

Dedicated branding at the coffee stand places your company in one of the event's busiest networking areas, creating repeated exposure throughout both days of the summit – exactly where conversations naturally begin.

CARPET BRANDING

Make an impression underfoot with your branded carpet (**1m × 1.5m**). Carpet must be provided by the sponsor, or printing can be arranged for an additional cost.

OTHER BRANDED ITEMS

On request, various Items, and other elements of the event can be named and branded according to your specifications.

SYNBIO
REACTOR
2025

SYNBIO REACTOR

MEET THE ORGANIZERS

The SynBioReactor Summit 2027 is brought to you by the **German Association for Synthetic Biology - GASB e.V.** - the leading professional organization dedicated to establishing synthetic biology as a key scientific and engineering discipline in Germany. The non-profit association serves as a primary community hub for scientists, students, and industry professionals.

GASB

gasb.de

In addition, this year's SynBioReactor is supported by **biobeyond**. The bio-innovation agency builds non-physical infrastructure for initiatives across the bioeconomy, providing the digital foundation on which our event is built as well as much of its visual identity. From the event's digital infrastructure and web presence to communication assets and on-site design, biobeyond helps translate the SynBioReactor's vision into a coherent experience before, during, and beyond the event.
